

DARWIN Automotive

12 November, 2019

Amal,

I have listed out the following points that define the various sections of our website.

1. **Why eBikes?** : A hybrid-electric eBicycle aims to provide a viable, affordable and truly an environment-friendly replacement for fossil-fuel bikes. This first phase of this new revolution is achieved by modernizing bicycle travel. A mix of the old-school bicycle with modern day controllers and DC motor is guaranteed to make heads turn.

Include the following image and maybe make it interactive. You may use any animations one being, pop up of the naming when the cursor hovers over the green parts. I have highlighted the image to be included in thick borders, use them.

a. [MK03 Report](#)

2. **Vehicle Specifications:** Use the Vehicle Specification section in the above document.

Make the table calm to the eyes. All specifications in the above should be carried over to the website.

3. **Mission:** Redefining transportation, one step at a time.
4. **Vision:** Refer the Notepad file.
5. **Frequently Asked Questions:** Include this section in the **Support** page. Let the questions be in blocks and the answer will appear when the block is clicked. Ex. [Support page, Ultraviolette Automotive](#). Include the same question as the above page.
6. **Vehicle Images:** I'll send you a link containing all the photos and videos.
7. **Hype No.1:** Use the text in the following document and fill the whole section with its content: [Hype No.1](#)
